

TRANSFORMING MBR THROUGH INNOVATION

SETTING THE STANDARD WITH A SUCCESSION OF TECHNOLOGY BREAKTHROUGHS

The MEMCOR® product line has been and innovative pioneer and leader in low pressure membranes for over 30 years and has had a dedicated MBR team since 1995.

MEMCOR MBR technology has led the industry with a series of 'Firsts to Market' advancements that have substantially improved the reliability and economics of MBR systems.

luPont", the DuPont Oval Logo, and all trademarks and service marks denoted with "", " or #

MEMCOR DEVELOPS CMF LOW PRESSURE CONTINUOUS MEMBRANE FILTRATION

 MEMBRANE OPERATING SYSTEM (MOS) INTRODUCED

 Allow easy cleaning of membranes & independent

 optimization of MOS & bio process.

RACK ASSEMBLY INCORPORATED IN DESIGN Compact racks enhance system design flexibility, easy installation and maintenance.

999

IMPORTANCE OF MLSS DISTRIBUTION IDENTIFIED The introduction of two phase flow MemietTH system greatly improves system performance with superior hydraulics within the membrane environment.

LOW ENERGY STEP CHANGE WITH PLUG FLOW AERATION

The MemPulse® MBR System introduces enhancements to cut energy consumption by more than half of traditional systems with no moving parts, while maintaining MLSS distribution and improving membrane cleaning.

17 INTEGRITY TESTING FOR IPR-DPR 15 psi, ready for IDR/DPR requirements. PRIMING VIA EDUCTORS INTRODUCED First to use priming eductors, eliminatin release tanks and vacuum pumps; quick becomes the industry standard.
